

Local traffic reports are normally given by one service in Chicago. They seem to be another mode of entertainment, the bantering between the disc jockey and the traffic reporter.

I pay for the service to hear music that grew from the Delta's of Mississippi, or a garage in Detroit. Music is a way to bring a country that is changing quickly together.

I can educate my children where this music came from, how human creativity modified it. I can do this because I choose to purchase the equipment to listen, and pay for it.

The bill is not about weather or traffic, it's about money. If local traffic and weather can be stopped, what is next.

It's amazing in this country TV was Free, there will be no commercials on cable if you pay. Why would NAB want to restrict valuable information to it's listeners of Satellite radio, MONEY. So Seattle Suttan can by time and sell you food 90% of the country can't afford. (but she is a registered Nurse).

Why doesn't NAB clean up the stations on the air now, the first amendment!!! Well I am exercising my first amendment by purchasing a service. Leave satellite radio alone.

I think "Chip" and "Gene" should worry why Americans are dieing every day. Ask Mom and Pop who lost a Son or Daughter what they think about Satillite Radio reporting the traffic and weather, and should it or not.
